Okay can I be honest with you? It's hard to learn all this stuff on your own - you can easily bite off too much at once, and struggle to **apply** what you're learning.

But if you take my **Beginner to Badass** course, I'll do all the hard work for you and bake the theory you NEED to know into bite-size music-based lessons.

Plus I cover all the other fundamentals of becoming a badass bassist - technique, rhythm, and a cool bass face - from the ground up.
